AMAN DHAKAR

Full-Stack Development, Software Development & Data Analyst

Gwalior, M.P **9644152306** mramankirar@gmail.com linkedin.com/in/amandhakar1480/ github.com/mramankirar **Portfolio**

PROFESSIONAL SUMMARY

Final-year **B.Tech Computer Science** undergraduate (2027) specializing in **Full-Stack Development**, **Data Analytics**, and **Software Engineering**. Built web full-stack applications using **JavaScript**, **React.js**, **Node.js**, **Express.js**, **MongoDB**, and **REST APIs** with Git/GitHub. Engineered interactive **Power BI** dashboards alongside **Python**, **SQL**, and **Excel** pipelines for data-driven business decisions. Solved **50+ DSA problems** across LeetCode and GeeksforGeeks. Currently interning as a **MERN Full-Stack Developer** at EduSkills AICTE and **Data Analyst** at Internship Studio.

EDUCATION

B.Tech in Computer Science — **Graduating: 2027**

ITM College, Gwalior — CGPA: 6.7 / 10

SKILLS SUMMARY

- **Languages:** JavaScript, Python, SQL, C++, Java, HTML5, CSS3
- **Web (MERN) Stack:** React.js, Node.js, Express.js, RESTful APIs
- **Data Analytics:** Pandas, NumPy, Matplotlib, Power BI, Excel
- **Databases & Cloud:** MongoDB, MySQL, Firebase, SQL Query Optimization
- **Developer Tools:** Git, GitHub, VS Code, Jupyter Notebook, Postman
- **Core Concepts:** Data Structures & Algorithms, Debugging, DBMS, OOPM, Operating Systems, Computer Networks, IoT

WORK EXPERIENCE

Data Analyst Intern | **Link** — **OCT 2026 - DEC 2026**

- Executed end-to-end data pipelines involving **extraction, cleansing, and transformation** using **Python, SQL, and Excel** to optimize data integrity and analytical reliability.
- Conducted **Exploratory Data Analysis (EDA)** and applied statistical methods to detect patterns, anomalies, and recurring business trends.
- Designed and deployed **interactive Power BI dashboards** tracking core business KPIs, accelerating executive decision-making.

MERN Full-Stack Development Intern — **OCT 2026 - DEC 2026**

- Built scalable web applications with **MongoDB, Express.js, React.js, and Node.js**, adhering to modular architecture and clean code principles.
- Designed and integrated secure **RESTful APIs** and database queries, enabling high-performance client-server data exchange.
- Developed modular, reusable **React components** and optimized backend route handling to elevate UI responsiveness and maintainability.

PROJECTS

Customer Churn Analytics | **Live** | **Github** — **SEPT 2026 - DEC 2026**

- Analyzed customer behavioral datasets using **Python, SQL, and Excel** to isolate key attrition factors and churn drivers.
- Performed automated **data cleaning and exploratory statistical analysis** to evaluate retention risk variables.
- Built interactive **Power BI reporting dashboards** to visualize retention patterns, cohort metrics, and churn probabilities.

MERN Stack E-Commerce Platform | **Live** | **Github** — **SEPT 2026 - OCT 2026**

- Created a dynamic, responsive e-commerce interface featuring real-time product filtering, search, and dynamic routing.
- Implemented full-stack capabilities using the **MERN stack**, integrating **JWT user authentication** and product catalogue management.
- Integrated **MongoDB schema models** with **RESTful endpoints** to ensure consistent data storage and low-latency API responses.

Myra AI Assistant – Windows Automation | **Active Development** — **OCT 2026 – Present**

- Engineered an intelligent desktop automation assistant using **Python** and **natural language processing** for Hands-Free OS interaction.
- Designed automated workflows for **system task execution**, file organization, and desktop application controls to streamline daily workflows.
- Architected the system with a focus on **local privacy, minimal latency**, and customized script automation for routine repetitive tasks.

CERTIFICATES

Data Analytics with Python & Power BI (EduSkills) | **CERTIFICATE** — **JULY 2026 – SEPT 2026**

- Applied **Python & Power BI** workflows to transform raw tabular records into actionable KPI summaries and dynamic visual dashboards.

Programming of C++ (ITM, Gwalior) | **CERTIFICATE** — **NOV 2023 – DEC 2023**

- Validated proficiency in **Object-Oriented Programming (OOP)**, algorithm design, and core memory management concepts in **C++**.

Aspire Leaders Program (Cohort 4) – Harvard University 2026 — **OCT 2026 – NOV 2026**

- Completed intensive modules centered on **leadership development, ethical reasoning**, critical problem-solving, and cross-cultural teamwork.

ONGOING PROJECTS

Global Trade & Supply Chain Intelligence Project | **In Progress** — **NOV 2026 – PRESENT**
